Adams Oval
Master Plan

Jensen PLANNING & DESIGN

Jensen Planning & Design was engaged by the City of Salisbury to prepare a Master Plan for the Adams Oval Reserve located in the heart of Salisbury North in Adelaide.

As part of the Hawksbury Park Urban Regeneration Project, which has seen large areas of public housing revitalised together with public infrastructure such as streetscapes and public reserves, the Salisbury Council initiated a Master Plan to address a number of recreation issues and improve recreational opportunities at Adams Oval.

The Adams Oval Reserve comprises developed sporting grounds including three turf pitches for soccer, one of these being fully fenced to allow for entry admission charges. The Reserve also includes club rooms, court space, passive recreation areas and a cycle speedway track.

The Reserve is the home ground for the Salisbury United Soccer Club and the Salisbury United Junior Soccer Club.

Community Engagement

An important objective of this Project was to engage with both the sporting clubs and with the local community. Jensen Planning & Design initiated a Charette process together with a written community survey to ascertain the views of both sporting and recreation clubs as well as the wider community.

The resultant Master Plan focused on:

- Recreation, community and club facilities
- Pedestrian networks / linkages
- Traffic management
- Supportive Environments for Physical Activity (SEPA) principles
- Crime Prevention Through Environmental Design (CPTED) principles
- Biodiversity initiatives
- Facility and asset management
- An implementation strategy including priority actions.

Location: Salisbury North
South Australia

Client: City of Salisbury

Budget: $15,000

Date: 2006/07
