

Piazza Della Valle

McLaren Vale Town Square

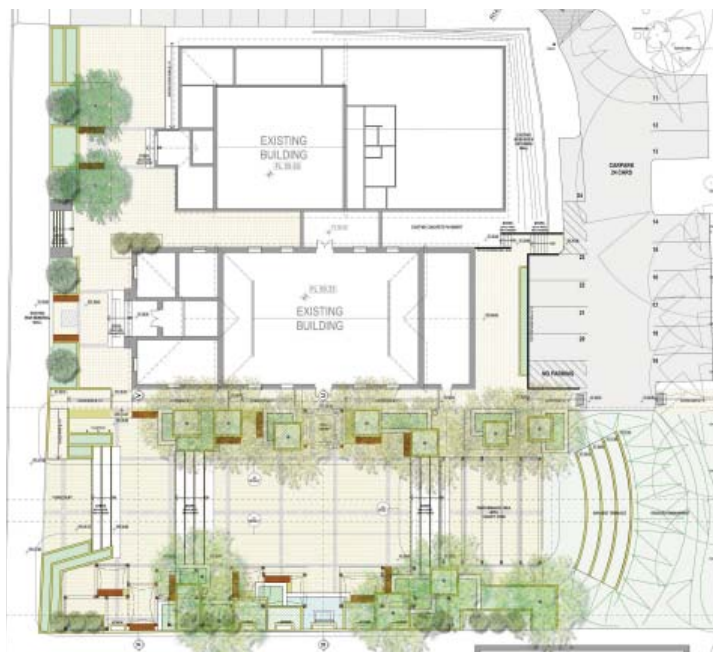

Jensen Planning + Design were engaged in association with Giordano & Associates to undertake the design and documentation of the Piazza Della Valle.

The project involved a design review of the previous master plan for the site and consultation with the community and many stakeholder groups.

The final design is driven by the piazza being a transitional space, that is both a destination and a thoroughfare.

This principle then drove the need for robust and flexible furniture and fixtures. The paving design and materials have been influenced by traditional piazzas from around the world.

This project is approaching final documentation and it is expected that construction will begin in mid 2010.

Location: McLaren Vale
Adelaide, SA

Client: City of
Onkaparinga

Date: 2009

In association with:
• Giordano & Associates
• Brecknock Consulting
